

Workpage will be ready soon

Another 3 PUZZLES to Solve: Here are three maths puzzles presented by the sprite boy, Danny. Press a button for a Puzzle. Read it slowly in the bottom corner. Danny's dog might prove to be helpful as you think of your approach. Click the colour underneath to get to the solution (and the approach). Then Danny will give his solution and how he did it using Scratch code. See the other 3 Puzzles, challenges (links on the Scratch project).
