Submarine & Helicopter

<https://scratch.mit.edu/projects/486392819>

Code to Create Bubbles

You control the submarine. Press the UP, LEFT or RIGHT keys to move it to collect starfish points. When you stop moving the sub, it descends to safe water at the bottom and disappears, but you can see its bubbles! You have 3 minutes to score 2000 points to win. Collect multiples of 20 points as long as you are touching the yellow starfish but, all the while you are in dangerous water bombarded by bombs from the helicopter. The red starfish is in safer water near the bottom but it is worth far fewer points. Each time you are hit by a bomb you lose one of your 20 lives. The game is over if you lose all your lives but, before it happens, you can get all your lost lives back by diving to the seabed. Then you are automatically returned to the danger zone and the game continues!
